

Stop fraud in its tracks Smarter identity intelligence with Fideo

CONNECT WITH US

3 billion identities, 1 powerful view

Our identity graph integrates massive amounts of connected metadata and behavioral patterns to create a unified view of over 3 billion individual identities.

- ✓ A unified view of more than 3 billion individual identities
- ✓ Dynamic, multi-layered relationships detected
- ✓ Anomalies detected using time-series data
- ✓ High-risk identities uncovered with unmatched precision

3.2 billion
identities

307 billion
identifiers and relationships

18 billion
monthly observations

Fideo Intelligence™ is different

Diverse data

Connect trillions of identity signals: public, private, and deep web data, financial institutions, eCommerce, call centers, web events, device/app usage, and human intelligence.

Continuous learning

Unlike traditional providers who use static data, our continuous update cycles run 24/7 to keep data fresh for better performance.

Real-time API

We flag high risk identities during applications BEFORE you let them in your system. Enrich your risk models and fraud products to keep fraudsters out.
